

## Wireframe

Our app will have 3 fragments:

- Home: where all the tasks and their status are listed. When click on each one of the task, user will be prompted to a detailed task page.
- Task: user is able to edit task name, set deadline, add contact(with method of "punishment") and delete task on this page.
- Setting page: user is able to add their account for apis (Facebook, Splitwise and etc) on this page.

## Class Diagram
